Dear Dagmar,

Thank you for the minutes of the ExCom call on Tuesday 27 March.

Our only comment remains the below which has not been registered. We wrote immediately after the meeting to the chair and all ExCom members to have it included please see attached message. We were not able to convey the comment as we were thrown off the call at one point and by the time we were back on line again the discussion had progressed.

It concerns Recommendation 5 in the table of the HSLG decision document “Strengthen ECW's relationship with GPE”. The focus here is on system strengthening and therefore it is relevant to refer to the LEGs, but not the clusters, in relation to the GPE (see text in brackets). We recommend that clusters be removed from this recommendation and, if needed, a separate point is adopted to cover clusters and other mechanisms with the following text: “Work in close alignment with existing mechanisms and planning partnerships.”
